
IIO-14180 Project Management and Evaluation

Credits

6.0 (3 hrs lecture)

Lead Instructor

Luis V. Montiel

Textbook

Meredith, J., Mantel, S., *Project Management: a managerial approach*, 9th edition, Hoboken, NJ, John Wiley & Sons, Inc., 2014

Supplemental materials

Taco Bell Corp. (Harvard 9-692-058)

The Boeing: From Concept to Production (A) and (B). (Harvard Business School, 1988)

BAE Automated Systems (A): Denver International Airport Baggage-Handling System (Harvard 9-396-311)

BAE Automated Systems (B): Implementing the Denver International Airport Baggage-Handling System (Harvard 9-396-312)

Campbell Soup Co. (Harvard 9-692-058)

Volkswagen of America: Managing IT Priorities. (Harvard 9-606-003)

Jet Propulsion Laboratory (Harvard 9-110-031)

Novo Nordisk Engineering: Running For Fast-Track Project Execution. (IMD422)

Course Description

Concepts and modern techniques required for an effective and efficient management of projects, from its conceptual and planning phases to its termination.

Prerequisites

COM-16203/Computer Applications Development

EST-11101/Probability

Major Status

Required

Course Outcomes

1. Identification of activities required to performed a project
2. Solve problems dealing with resource constraints
3. Use software for project management
4. Prepare a project charter
5. Risk Management
6. Monitoring and control of project

ABET Outcomes

- e) An ability to identify, formulate and solve engineering problems.

Course Topics

- Introduction to project management and evaluation
- Strategic management and project selection
- Management Risk
- Project planning
- Budget estimation
- Project scheduling
- Resource management
- Project evaluation and control
- Project closure
